

Have backup online, have peace of mind!

BITWAY Backup Solution

Backup any data, anytime, anywhere.

Bitway Online Backup with LiveProtect™. Backup any data, any time, to any destination

BitWay gives you the flexibility and power to create a backup that will meet your need. Backup My Documents to your USB drive each hour or backup your entire computer to your external hard drive monthly or engage LiveProtect™ to have BitWay watch your files and provide continuous real-time data protection. You save it - we back it up offsite silently and automatically, keeping an unlimited version history that lets you roll-back to any point in time.

BitWay provides Big-Business IT best-practice for the little guy true multi-destination, multi-schedule backup that can be adapted to meet your needs but at consumer price. BitWay online backup is software as a service billed at a low monthly subscription. A basic annual subscription costs less than most stand-alone backup software packages let alone a tape-drive or an external hard-drive.

Local Backup

Online backup is invaluable but simply cannot protect your entire computer. Using BitWay local backup system, you can backup your entire computer, open/locked files and operating system files to any local medium, whether it is an external USB drive, a local network location, a USB stick or an iPod.

Unlimited Number of Computers

Backup as many computers as you like using one account. Over 60% of households have more than one computer, and BitWay allows you to backup and recover from all of your machines. Backup your home, office and laptop computers all on one account for easy access to ALL your files from anywhere.

Have backup online, have peace of mind!

Unlimited Versions & Powerful Recovery

Keep an unlimited version history of all your files - roll back your books to last year's tax records if you wish. Use our time machine feature to go back to the date you want to restore and recover that snapshot of files & versions.

Enterprise Compression & Transfer Systems

BitWay compression system only backs up changed files and then only the changed 1's and 0's are transferred. On a 500 MB database (MYOB/Intuit/Turbo Tax) the daily transfer can be as small as 5 KB. Our transfer system is enterprise grade, meaning that large file transfers are resumed at the KB of interruption, and does not start at the beginning like most online backup systems.

Fully Flexible Scheduling

Monthly, weekly, daily, hourly or instant backup.

Global Roaming Access to Your Files

Because your data is being backed up daily to the BitWay Backup Server Grid you can access your data anywhere in the world using just a web-browser. Never be without that critical file again.

LiveProtect™

Engage BitWay LiveProtect™ to have BitWay back up files as soon as a change is detected.

Intelligent File Filters

Tell BitWay Online Backup to watch your My Documents folder but to ignore all *.mp3's and *.avi's. Alternatively, tell BitWay to only protect *.doc, and *.xls. Either use our pre-sets, or set your own inclusion/exclusion mask.

Archiving

Unlike other online backup systems, we do not delete the file from your backup just because you delete the file from your computer. Over 80% of data loss occurs due to accidental deletion. Rest assured, we keep every version of every file forever. Unless you choose to remove it.

One-Click File Sharing

From inside the Online Recovery Interface you can share your files with anyone to an email address. Never have a large attachment bounce again. Just share your backed-up data with your friends and colleagues. Or if you are a home user simply share photos or videos.

Threats to Data Security	Features to Protect Data
Hardware Failure (40%) Hardware Destruction (3%) Theft (9%)	Integrated Local & "Universal" Backup Multi-data Center Architecture Immediate Global Access to Files via Browser File Sharing with Security Robust File & Network Support
Human Error (29%)	Unlimited Versioning with Efficient Network Transfer Archiving Eliminating Worry About Accidental File Delete
Software Error (Corrupt Files, 13%) Viruses (6%)	Continuous Data Protection with Minimal Performance Impact Flexible Scheduled Backup
